

# The biggest change in transport in 2026

## New EU regulations for van transport.

### Check out what will change and choose the optimal vehicle.

| Golden rule for the shipper |                                                                                       |
|-----------------------------|---------------------------------------------------------------------------------------|
| Express 2.5t Van            | Urgent, small shipment up to 3 pallets, critical lead time                            |
| Express Van                 | Medium shipment up to 10 pallets, dedicated transport                                 |
| Solo                        | High-volume shipment, possible access to city centres, dedicated transport            |
| FTL                         | Highest payload capacity, direct warehouse-to-warehouse transport, flexible lead time |

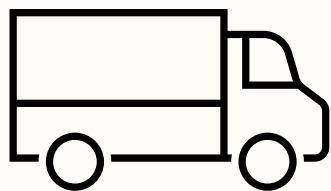

#### Before 1 July 2026

| Type        | GVM  | Capacity   | Pallets | Tachograph |
|-------------|------|------------|---------|------------|
| Express Van | 3.5t | 1 200 kg   | 8-10    | NO         |
| Solo        | 7.5t | 3 000 kg   | 15-18   | YES        |
| FTL         | 40t  | 24 0000 kg | 33      | YES        |

#### After 1 July 2026

| Type             | GVM  | Capacity   | Pallets | Tachograph |
|------------------|------|------------|---------|------------|
| Express 2.5t Van | 2.5t | 500 kg     | 3       | NO         |
| Express Van      | 3.5t | 1 200 kg   | 8-10    | YES        |
| Solo             | 7.5t | 3 000 kg   | 15-18   | YES        |
| FTL              | 40t  | 24 0000 kg | 33      | YES        |

 **Express Van 3.5t will require a tachograph after 1 July.**  
**Transit Time for Routes over 750 kms will be increased.**

**New Visline service!**  
These vehicles are **completely exempt** from the new regulations!  
**Delivery time in Europe: Lightning fast** ⚡  
Routes over 750 km are completed without additional downtime, just like the existing Express Van.
